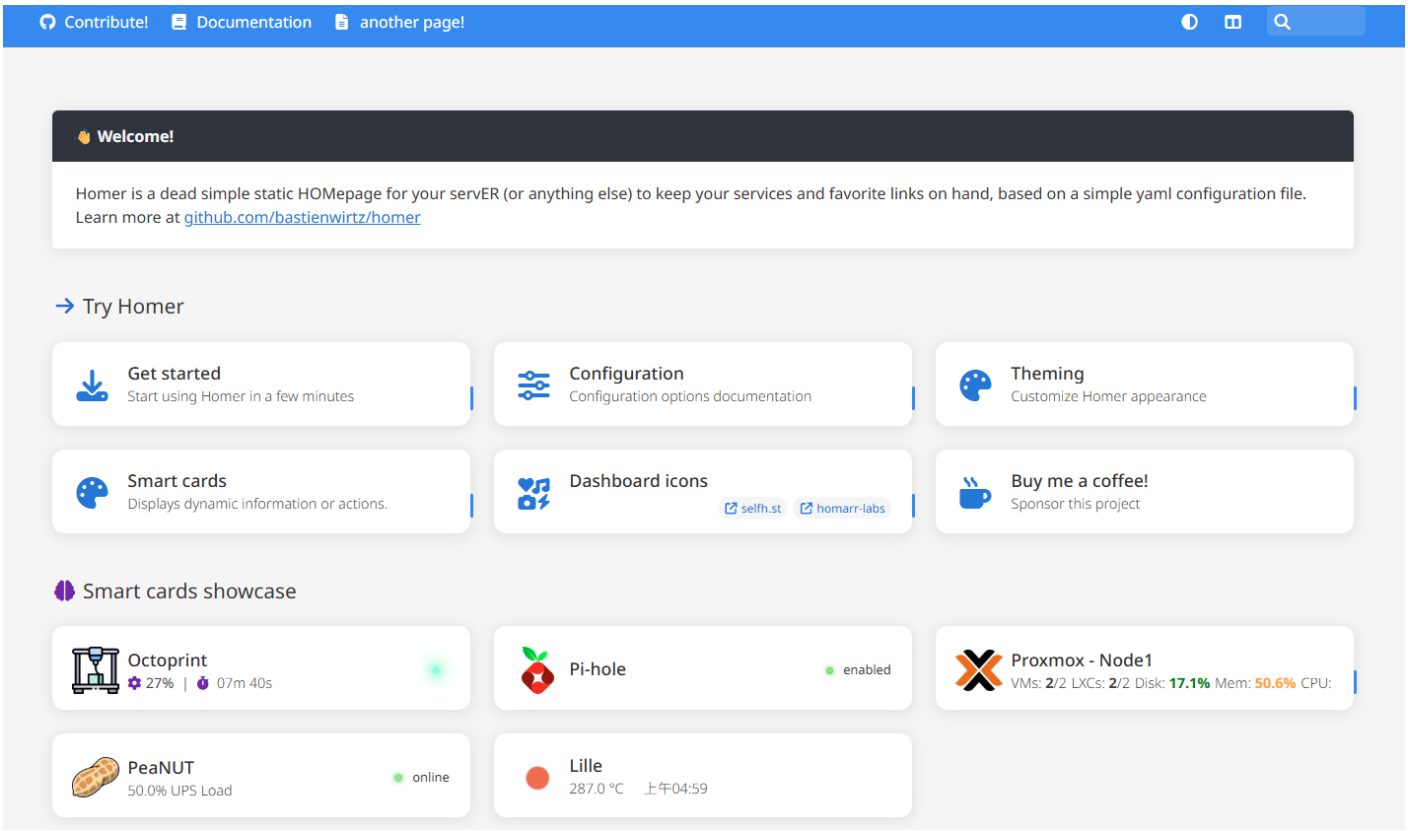
Docker ?? Homer ????



Homer□□□□□□□□□□ **yaml □□□□□□□□□□□□**

?? Homer

□□□□ **Portainer□□□□□□□** **Portainer**

Docker□□□□□□□

```
mkdir /var/lib/docker/volumes/homer/assets
```

□□□□□□□□□ **uid □ gid 1000 □□□□□□□□□□□**

```
chown -R 1000:1000 /var/lib/docker/volumes/homer/assets
```

Portainer□□□□□□□□

```
services:
  homer:
    image: b4bz/homer:latest
```

```
    container_name: homer
    volumes:
      - /var/lib/docker/volumes/homer/assets:/www/assets # Make sure your local config
directory exists
    ports:
      - 9003:8080
    environment:
      - INIT_ASSETS=1 # default, requires the config directory to be writable for the
container user (see user option)
    restart: always
```

將 **assets** 內的 **config.yml.dist** 複製為 **config.yml**

```
cd /var/lib/docker/volumes/homer/assets
cp config.yml.dist config.yml
```

編輯 **config.yml** 自訂你的面板，以下只使用最簡單的頁面設定，其餘整合功能可以參考官方

https://github.com/bastienwirtz/homer

```
services:
  - name: "HomeLab"
    icon: "fa-solid fa-brain"
    class: "highlight-purple"
    items:
      - name: "Proxmox - Lab"
        logo: "assets/icons/custom/proxmox.png"
        url: "https://192.168.18.248:8006/"
      - name: "Proxmox - Home"
        logo: "assets/icons/custom/proxmox.png"
        url: "https://192.168.22.254:8006/"
      - name: "Proxmox Backup Server"
        logo: "assets/icons/custom/proxmox.png"
        url: "https://192.168.74.244:8007/"
      - name: "Librenms"
        logo: "assets/icons/custom/librenms.png"
        url: "http://172.20.10.1:8000"
      - name: "SmokePing"
        logo: "assets/icons/custom/smokePing.png"
        url: "http://192.168.45.246/smokeping/"
      - name: "Portainer"
```

```
        logo: "assets/icons/custom/portainer.png"
        url: "http://192.168.155.245/"
```
